ROAD BUILDING

EFFECTIVE WORK ON ROADS

Pulling a Drag Through Mud When
Soil is Sticky is Waste of Time—
Farmers Work Together.

We have a road drag club of 33
members that has been in existence
for nearly two years. About a third
of the members own drags and these
are in use nearly all the time. It is
understood that any member has a
perfect right to hitch to anybody's
drag that is not in use.

We have learned a good many
things about road dragging since we
started, writes W. D. Dennis of Mis-
souri in Farm Progress. Dragging a
road is not quite as simple as it looks
and there are some kinds of dragging
that are not worth doing. For in-
stance we have found that pulling a
drag through the mud when the soil is
sticky enough to cling to the drag is
a waste of time.

Nor do we ever drag a road that is
bone dry. All the good that does is
to heap the dust in the center of the
highway. Of course, we have no one
in the club who has authority to send
a man home if he wants to drag a
road in dry and dusty weather, but it
is understood that such road work is
foolish and no one does it.

Drive the team at a walk, always,
is another of our unwritten rules.
You don't want the drag bounding and
hopping along, leaving the road sur-

face dragged in places and skipped in
others. Slow and steady does the best
work.

We have no heavy drags. A few
months' experience showed us they
were not what we wanted. We use
light drags, pulled over the road at
about the regulation angle of 45 de-
grees. This pulls a small amount of
earth over to the center of the high-
way and firms the whole wheel path.

We have a 60-foot highway. Natu-
rally we do not try to drag all of that
surface. What we try to maintain is
a roadway of about twenty feet in
width. We begin in the center and try
to first get a good wheel track width
in fair shape. As soon as this is done
the drags are lapped a little farther
over into the undrugged roadway at
the sides.

We drag the roads as soon as pos-
sible after every rain. The best work
is done after a rain and just before
the road surface begins to harden as
it dries. One side of the wheel path is
taken going in one direction, and the
other side is smoothed up on the re-
turn trip. Half a dozen drags on a
road after a spring rain will work
wonders. Keep this up a few weeks
and you are able to build the center
of the road up to a height of from
ten to twelve inches above the level of
the edges. This gives a good drain-
age and makes the future dragging
easier and much more effective.

Road dragging is something that
must be kept up continually. Eternal
dragging is the price we have to pay
for dirt roads that are above the av-
erage. If we paid for the work put on
them it would probably cost us all of
\$10 and maybe \$12 a mile for the
year. Some years the roads will re-
quire much more work than in others
because of the weather conditions. The
amount of traffic and the nature of
the soil on which the road is built
are other factors that affect the
amount of dragging necessary.

There are some spots in every road
that should be graded and filled be-
fore you can expect to do very much
with the drag. A drag will not help
these bad spots much. Get them fixed
up once, though, and you won't have
much trouble in keeping them in shape
with the drag.

Reduce All Grades.
Reduce all grades to at least five per
cent if possible. In some states roads
are laid out on section lines and hills
must be gone over, but where possible
avoid steep grades, as these are a con-
stant cost for maintenance and danger
ous to travel.

Work Systematically.
The way to build a good road is
to work at it systematically and con-
tinuously. You can't do a little now
and then and have it come out the
way you want it in the long run.

She Was Smothering.

Rockford, Ala.—Mrs. M. C. Pas-
chal, of this place, says: "I was taken
with nervous prostration, and had
headache, backache, pains in my
right side, and smothering spells. I
called in physicians to treat my case,
but without relief. Finally, I tried
Cardui, and it gave perfect satisfac-
tion. I recommend it to every sick
woman." Are you weak, tired, worn
out? Do you suffer from any of the
pains peculiar to weak women? Car-
dual has a record of over fifty years in
relieving such troubles, and will cer-
tainly benefit you. It prevents those
frequent headaches, and keeps you
up, out of bed, feeling happy. Try
Cardui.—Advertisement.

QUESTION CLEARED UP

**Hopkinsville Readers Can No
Longer Doubt The Evidence.**

Again and again we have read of
strangers in distant towns who have
been cured by this or that medicine.
But Hopkinsville's pertinent ques-
tion has always been "Has anyone
here in Hopkinsville been cured?"
The word of a stranger living a hun-
dred miles away may be true, but it
cannot have the same weight with us
as the word of our own citizens whom
we know and respect, and whose evi-
dence we can so easily prove.

Mrs. J. T. Cannon, 609 O'Neal St.,
Hopkinsville, says: "I have given
Doan's Kidney Pills to my children
at various times and have always
found them beneficial. Whenever
one of my children is bothered with
kidney weakness, a few doses of
Doan's Kidney Pills relieve the at-
tack."

Human Vanity.

We all try to be wise; and inas-
much as most of us have very little
to be wise about of our own concep-
tion, we endeavor to be wise through
the medium of communicated ideas
and precepts. If you make a state-
ment to the ordinary man, and that
statement seems to him to have ele-
ments of information or understand-
ing or novelty or rationality, he re-
peats the same statement when he
gets an opportunity—not as your
statement, but as his. The sages have
been remarking on the prevalence of
human vanity for some thousands of
years.—Samuel G. Blythe in the Sat-
urday Evening Post.

**Man Takes His Own Medicine
Is An Optimist.**

He has absolute faith in his medi-
cine—he knows when he takes it for
certain ailments he gets relief. Peo-
ple who take Dr. King's New Dis-
covery for an irritating cold are
optimists—they know this cough
remedy will penetrate the linings of
the throat, kill the germs, and open
the way for Nature to act. You
can't destroy a cold by superficial
treatment—you must go to the cause
of the trouble. Be an optimist. Get
a bottle of Dr. King's New Dis-
covery to-day.—Advertisement.

Destroying the Mosquito.

The way to destroy the mosquito in
its larval stage is to pour a little ke-
rosene on the surface of the pool or
stream inhabited by the industrious
wiggler. The oil shuts out the sup-
ply of oxygen from the water be-
neath. The wiggler rises tail first to
the surface and tries to force his
breathing tube through the thin layer
of oil. He fails and promptly dies
from suffocation—a suitable death for
so frigidicidal an insect.

Pipefish Has "Pocket."

The pipefish, as it is called, from
the length of its jaws, has a pocket on
the under side of its body nearly half
its length. It is found in the male
species only, and is the only part of
its body which is unprotected by large
flat plates, which take the place of
scales in its protective armor. In this
pocket the young fish are carried very
similar to the way the kangaroo car-
ries its young.
